COURSE OBJECTIVES:

Accounting Information Systems brings together the principles and concepts learned by the undergraduate accounting major into the formalized, organized environment of accounting systems. Emphasis is placed throughout on (1) management and system controls for automated as well as manual systems, (2) the role of the internal and external auditor in the systems development life cycle and (3) systems evaluation using the concepts and techniques of operational auditing.

The course will help you to develop your ability to look at complex business information system issues, analyze them and use your problem solving skills. In particular, the course should give you insight into the basic elements of consulting as viewed from the accounting perspective. Also, your critical thinking skill should be improved as you develop the solution to a real world problem in the group project portion of the course.

REQUIRED TEXTBOOK:

COURSE REQUIREMENTS:

There will be 12 homework assignments. You may choose to drop the grade of 2 homework assignments. These homework assignments exist to allow you to stay up to date on the material. The homework will be assigned a grade from 0 to 5. The homework should be submitted via Blackboard by 2:00pm on the due date as indicated in the syllabus. The submission link on Blackboard will be disabled at 10pm on the due date and late assignments will NOT be accepted. Note that on Blackboard, you need to click “submit” to actually submit the homework. Hitting “Save” merely saves your work in your account and does not submit it!
