COURSE DESCRIPTION:

D This course provides a synthesis of public and private sector perspectives and across a variety of industries and countries on key project management practices, challenges and opportunities in order to enhance the understanding of their nature and dynamics within a given contextual framework, whether that may concern private industry, multilateral, governmental or non-governmental organizations.

COURSE CONTEXT:

D This course provides a synthesis of public and private sector perspectives and across a variety of industries and countries on key project management practices, challenges and opportunities in order to enhance the understanding of their nature and dynamics within a given contextual framework, whether that may concern private industry, multilateral, governmental or non-governmental organizations.

D A foundation in conceptual, theoretical, and practical considerations for project management covering contemporary issues and relevant topics such as the evolution of the project management discipline from a back-office operation to a strategic practice and skill-set, the “projectization” of business and in the context of emerging “gloCalization” trends (such as outsourcing of value-added services as well as Research and Development activities) and the advent of Public-Private Partnerships as an increasingly popular modus operandi for the design and execution of a variety of projects.

CARAYANNIS, E.G., ISTM 6204, 01 / 17 1
