COURSE DESCRIPTION:

This course focuses on the information resource management principles in the public, private sectors as well as the non-profit sectors where organizations face many complex bureaucratic, budget, standards, and administrative issues as well as a high rate of technological change and related challenges and opportunities.

CONTEXT FOR THE COURSE:

Course Overview

This course focuses on the information resource management principles in the public, private sectors as well as the non-profit sectors where organizations face many complex bureaucratic, budget, standards, and administrative issues as well as a high rate of technological change and related challenges and opportunities. This course presents the fundamentals and competencies required for Chief Information Officer (CIO) or Chief Technology Officer (CTO) positions or their support teams and who play an increasingly critical role within organizations - managing information technology (IT) decision processes and guiding IT decisions as they relate to the business and mission of the organization (whether it is a business, non-profit, state or federal entity).
